PROFESSIONAL SUMMARY

Frontend-focused BSc Computer Science student who builds React apps, including a currency converter with API-based exchange rates and a Context API theme switcher. Solved 200+ LeetCode problems in C++. Seeking a frontend developer internship.

TECHNICAL SKILLS

Programming Languages: C++, JavaScript

Frontend Development: HTML5, CSS3, Tailwind CSS, React, Responsive Web Design

Tools and Technologies: Vite, Git, GitHub, Visual Studio Code, npm

Development Concepts: API Integration, DOM Manipulation, React Components, State Management, Context API, Event Handling, Input Validation

PROJECTS

Currency Converter (React, Vite, Tailwind CSS) | Live Demo | Code

- Converts between currencies using API-based exchange rates, with input validation that rejects invalid amounts.

Theme Switcher (React, Context API) | Live Demo | Code

- Switches the whole UI between light and dark mode by sharing theme state via the Context API.

Tic-Tac-Toe Game (HTML, CSS, JavaScript) | Live Demo | Code

- Detects wins and draws using JavaScript game logic, in a responsive interface.

Rock-Paper-Scissors Game (HTML, CSS, JavaScript) | Live Demo | Code

- Built a game where the bot picks its moves automatically and JavaScript logic decides the result.

Personal Portfolio Website

- Presents my projects and skills in a responsive layout that works on mobile and desktop.

PROBLEM SOLVING

200+ LeetCode Problems Solved (C++)

- Practiced arrays, sorting, binary search, prefix sums, and matrix problems to build logical thinking and write efficient solutions.

EDUCATION

Bachelor of Science in Computer Science (BSc CS)

M.B.P.G. College, Haldwani, Uttarakhand, India | Semester 3 | CGPA 6.5+
